

## 2 – DATA TREATMENT PLAN

Create a data treatment plan, and for each data item

- describe how (\*) this data must be
- ... **stored**
- ... **transmitted**
- ... **logged**
- ... **backed up**
- and when it must be **deleted!**

(\*) how: plain, masked ("XXXXX 123"), pseudonymised, anonymised, encrypted, hashed.

**Also:** consider integrity protection.

Item	Store	Transmit	Log	Backup	Delete
<b>Customer</b>					
- Name	Plain	Encrypted	Pseud.	Encrypted	BDSG
- Bank	Encrypted	Encrypted	Masked	Encrypted	BDSG
...	...	...			
<b>Marketing E-Mail</b>					
- Recipient	Plain	Encrypted	Pseud.	Encrypted	BDSG
- Text	???	???			
- Protocol	???	???			

**Also:** consider integrity protection.

**THIS DEPENDS ON YOUR SPECIFIC APPLICATION/SCENARIO!**

**I AM NOT A LAWYER!**
