

JENNER HALL FEN

Reasoning about the security of a system is impossible without

- ▶ knowing what you want to protect against ([threat model](#))
- ▶ knowing what you can ultimately rely upon ([trust anchor](#))

TRUST ANCHORS

SLEEPER CENTER

Problem: You do not know when to start trusting / stop discussing

Solution: Define your trust anchors

**Threatening not discussed here but it is really important!*

TRUST ANCHORS

1. You trust your trust anchor(s) – they are secure by definition

TRUST ANCHORS

Problem: You do not know when to start trusting / stop discussing

Solution: Define your trust anchors

Reasoning about the security of a system is impossible without

- ▶ knowing what you want to protect against ([threat model](#))
- ▶ knowing what you can ultimately rely upon ([trust anchor](#))

** Threat modelling not discussed here but it is really important!*
